

SILENT FOREST

Help us collect BINOCULARS!

Have you ever tried birdwatching with binoculars in nature? Its a really amazing to see the beauty of birds up close. Let us help the children of Indonesia have this amazing experience too.

Please give us your old (but still functional!) binoculars. Your contribution will help local children appreciate the beauty of their wonderful songbirds and other wildlife in their natural environment.

Every single day songbirds are being taken in huge numbers from the forest of Southeast Asia, simply to be traded as pets or used in singing contests. Some of the most sought-after species are now at the great risk of extinction, and on some islands they have disappeared completely. It is time to act now, before the forests fall silent forever.

Help the songbirds with us.
Thank you!
